System Requirements

Before installing the BPMN Modeler 6 v1 for Visio, it is very important that the server and/or workstation configurations meet the requirements listed below. If you have any questions regarding the system requirements, please contact your Account Manager. The system requirements are as follows:

The Interfacing BPMN Modeler runs as an add-on for Microsoft® Visio 2003, Microsoft® Visio 2007 and Microsoft® Visio 2010, all are 32bits version. If you have an older version, upgrade your version of Visio before installing the Interfacing BPMN Modeler.

The modeler also requires the operating system Microsoft® Windows XP or Microsoft® Vista or Microsoft® Windows 7.

Installation

Once you have downloaded the Interfacing BPMN Modeler:

1. Extract the contents of the .zip file to a safe location.
2. Run the **bpmn_modeler_6.1_setup.exe** file. The Installation Wizard will open.
3. The installation splash screen is displayed and installation requirements verification is performed.
4. The Welcome page is displayed. Click **Next**.
5. Click **I Agree** to accept the terms of the license agreement.
6. The Components page is displayed with the space required listed. Click **Next**.
7. Accept the default installation location, or browse for the desired location, and click **Install**.
8. The installation details page is displayed.
9. Click **Finish** to complete the installation.

If you have any questions about the installation, please contact our support team.
